EYAD AMIR MOHAMED NAGUIB

Computer & Communications Engineering Student | Aspiring AI/ML Engineer
+20 10 07603503 | amireyad93@gmail.com | LinkedIn

SUMMARY

Computer & Communications Engineering student at Alexandria University (GPA 3.26, graduating 2028), training in machine learning through DEPI's Microsoft ML Engineer track. Built and deployed a data-analysis dashboard on ~271K records, with a solid foundation in Python, data structures, algorithms, and OOP. Seeking AI/ML internship opportunities.

EDUCATION

B.Sc. in Computer & Communications Engineering — Alexandria University *Expected Graduation: 2028 | GPA 3.26*
IGCSE — Innovation Language School, Alexandria *2023, Score 99.89%*

EXPERIENCE

Machine Learning Engineer Trainee — DEPI (Digital Egypt Pioneers Initiative) – AI & Data Science, Microsoft ML Engineer *Aug 2026 – Present*

- Engineered ML pipelines in Python, translating raw data into scalable data science models using preprocessing and visualization techniques.
- Applied Deep Learning, Computer Vision (Transfer Learning), and NLP (Attention Models) techniques as part of the Microsoft ML Engineer curriculum.
- Explored deployment on Microsoft Azure and MLOps concepts (MLflow, Hugging Face) to support the model lifecycle.

Operations Intern — Abu Qir Fertilizers and Chemicals Industries Company *Aug 2026 · Alexandria*

- Two-week technology rotation covering SAP data flow, networking and cybersecurity fundamentals, Agile/Oracle APEX practices, and introductory data analysis.

Summer Engineering Intern — Egyptian Electricity Transmission Company (EETC) *Jul 2026 · Egypt*

- 75-hour internship on Substation Automation Systems (SAS) and SCADA fundamentals: real-time monitoring, control, and communication data flow in a national power transmission utility.

PROJECTS

Olympic History Dashboard — Python (pandas, Plotly, Streamlit) — Github

- Built and deployed an interactive multi-tab EDA dashboard analyzing 120 years of Olympic athlete data (~271K records): participation trends, physical-attribute comparisons, age vs. medal likelihood, and country medal rankings with user-filterable visualizations.
- Diagnosed missingness patterns in Age/Weight/Height and applied group-wise median imputation (by Sex/Sport/Event); de-duplicated team-event medals and reconciled historical NOC code changes (e.g., Germany, Russia) for an accurate host-country medal advantage analysis.

Learning Management System (LMS) — Java | Team of 4

- Co-developed a desktop LMS with a layered architecture (UI → service layer → JSON persistence) built on OOP principles.
- Owned the authentication and role-based access control module (Students / Instructors / Admins) and input validation across the app.
- Contributed to the quiz engine and certificate-generation features.

Dictionary using AVL Tree & BST — C

- Implemented AVL (self-balancing) and BST trees from scratch for O(log n) word search; benchmarked against unbalanced trees to measure the efficiency gain.

TECHNICAL SKILLS

Machine Learning: Classification, Regression, Clustering, Deep Learning, scikit-learn, TensorFlow, PyTorch, CNNs, Transfer Learning, Embeddings, Feature Engineering, Model Evaluation

Data & Visualization: NumPy, pandas, Matplotlib, Seaborn, Plotly, EDA, Data Preprocessing, PCA, Streamlit

Cloud & MLOps: Microsoft Azure,MLflow, Docker, Hugging Face

Databases & Languages: Python, Java, C, SQL, MATLAB , MYSQL

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming (OOP), Design Patterns, Signal Processing

Developer Tools: Git, Jupyter Notebook, Google Colab , Github , Linux

Languages: Arabic (Native), English (Fluent)
